### SYNOPSIS OF COAL MINING REGULATIONS

Coal mining regulations of the Dominion in Manitoba, Saskatchewan, Alberta, the Yukon Territory, the North West Territories and British Columbia, may be found for a term of twenty-one years at an annual rental of \$1 per acre. No more than 2,500 acres will be leased to one applicant.

Application for a lease must be made to the Agent or Sub-Agent of the district in which the land is situated.

In surveyed territory the land must be divided by sections or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be marked out.

Each application must be accompanied by a fee of \$5, which will be refunded if the rights applied for are not available, but otherwise a royalty shall be paid on the grossable output of the mine at the rate of one cent per ton.

Every Lessee of coal mining rights which are not being operated shall furnish the district Agent of Dominion Lands with a sworn statement to that effect at least once in each year.

The lease will include the coal mining rights only, but the lessee may be permitted to mine phosphate or other minerals on the land of the mine at the rate of \$100 per acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. Cory,  
Deputy Minister of the Interior.

### SYNOPSIS OF CANADIAN NORTH-WEST HOMESTEAD REGULATIONS

Any person who is a Canadian citizen, or a person who has been domiciled in Canada for at least one year, and who is not a member of the armed forces of the Crown, may be entitled to a homestead of 160 acres.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

### PLANS NOVEL IMPROVEMENT

WILL DELIVER COAL FROM SHAFT DIRECT TO C. P. R. BUNKERS.

OUTPUT INCREASING

Canadian-American Company Making Rapid Strides Toward Complete Rehabilitation—New Ship, 700 Tons and Will Reach 1000 tons by August.

A novel improvement and one which will not only be an important one for this company but a vast convenience and considerable economy for the C. P. R. is planned by General Manager Muller of the Canadian-American company. By means of it the use of locomotives in supplying coal for the C. P. R. coal chutes here will be discontinued and the coal supplied locomotives will go direct from the shaft of the Canadian-American company to the C. P. R. bunkers.

The plan contemplates the building of a trestle from the present tipple at the shaft across the C. P. R. tracks to the coal pockets on which the mine cars will run from the shaft to the bunkers, be dumped into the pockets and the empty cars gravitate back to the shaft, thus doing away with the placing of cars on top of the bunkers with a locomotive, always a more or less ticklish and sometimes dangerous piece of business in bad weather.

As past experience has shown, an while two men will do the work it now takes three to do. The saving in convenience and cost may be seen from the fact that whereas now the coal must be dumped at the shaft tipple into a railroad car, the car is switched back to the scales and loaded and then placed on the trestle. As a result, the mine cars will run out on the trestle to the scales there placed, weighed and continue on across to the pockets and dumped and sent back by gravity.

Mr. Muller has had the scheme in mind some time and last week when Acting Superintendent Chudleigh was here, proposed it to him. Mr. Chudleigh's quick eye to business took in the simplicity and economy of the scheme and he felt to it with avidity. The subject has been reported on to headquarters and there is little doubt that it will be adopted.

The coal from the shaft, from which shipments commenced last week, is proving of such superior quality that already two buyers have been on the ground seeking to secure the entire output. The output has now reached 125 tons and in July will be 250 tons a day.

The output of the company's mines is increasing steadily. The main mine is now producing 600 tons a day, making the total output something over 700 tons. By July it will easily pass 800 tons and by August, Mr. Muller states, it will reach 1000 tons. And that's going some for a property which had no production at the beginning of the year.

Mr. Muller has installed another simple and inexpensive improvement that is nevertheless important. When the water works failed last week the company had no water for its boilers. Mr. Muller overcame the difficulty by placing a tank on the tipple at the shaft into which he turned the water pumped from the shaft and by laying pipes to the power house and over to the main tipple, is able to supply all the water required whether the water system does business or not.

Mr. Muller intends to enlarge on the idea when other improvements at the shaft are completed, by placing a large tank on the tipple structure at the shaft from which he will be able to supply water to the town should the water system give further trouble, by simply connecting up with the principal main.

Within recent days, the second cage has been installed at the shaft and the cages now run counter-balance in the two compartments, enabling the shaft plant to handle a large tonnage.

It is the intention to begin in about

### BAD FIRE AT LUNDBRECK

Lundbreck was visited Saturday by the first serious fire the town has had. The lively stable belonging to J. C. Allison and conducted by Mason and Green, Mr. Allison's office, the residence of John Allison, the blacksmith shop and the residence of H. W. Eshom and the training stables of W. T. Kddy were destroyed.

The fire started in the lively stable from what cause it is impossible to tell as there was no fire anywhere about the premises. It was discovered at about noon and spread so rapidly that it was impossible to get all the stock out and four head perished. Part of the rig and part of the furniture of the Allison and Eshom residences were saved but all else was burned. Of the four horses burned, two belonged to Mason and Green and two to a North Fork rancher. The latter team had just been put in the stable to feed by Vernon. Wilson of the North Fork who had come to Lundbreck on business.

A storm wind was blowing at the time and with no fire protection little could be done but the townspeople turned out and did their utmost to save such property as could be moved and for which the sufferers express deep appreciation.

The loss will aggregate something above \$6000. J. C. Allison is the heaviest loser, his loss being about half the whole. There was some insurance but it will not cover half the loss.

### GETS CARBON HILL SHARES

Finding that Andrew Hackett was in partnership with George Scott and Harry Matheson in the acquisition of five sections of coal lands near Lethbridge, Alta., Judge Henry L. Kennan in the superior court yesterday decided that he is entitled to one third of the 60,000 shares of stock of the Carbon Hill Coal and Coke company.

Hackett alleged that after the acquisition of the coal lands, and while he was absent, Scott and Matheson combined with one Wright and W. D. Applequist and organized the company for the purpose of shutting him out.

Judge Kennan decided that Hackett is entitled to have 200,000 shares of the stock or a judgement for \$100,000 against his co-partners—Spokesman-Review.

The above refers to litigation in the Washington court over the Carbon Hill Coal property on the South Fork.

Two weeks, further improvements at the shaft proper in the handling of the increasing output. As an extension of the tipple station will be built to the west while a trestle will be thrown around both sides of the gullows frame, on which tracks for empties will be laid. When finished the laries will come from the cage and dump, then gravitate around to the west side of the shaft and be there stored ready to be run into the cage as the load comes off, thus eliminating all delay and by allowing the cages to be in constant operation, enabling the plant to handle a very large output.

Thus it will be seen the company is making excellent progress. But does not embrace all the good things in store for Frank. Managing Director Gobo is expected here next week to prepare the reports for the annual meeting of the company to be held in Paris next month, after which, announcement of plans contemplating enlargements vastly greater than any yet proposed may be expected.

### PUBLIC NOTICE

A sitting of the district court will be held at Edmonton, Alberta, on Tuesday, June 8th, commencing at 10 o'clock A.M. For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

### OVERT ACTS AT PASSBURG

SHOTS FIRED PRESUMABLY TO INTIMIDATE WORKMEN.

### BUNKHOUSE SHOT UP

Also Cabin Occupied by Two Men Who Decline to Join Strike—General Manager Threatened—Miscellaneous Escape Decried but Developments Expected.

The first overt acts since the present coal strike was inaugurated are reported to have occurred at Passburg during the week when on different occasions shots supposed to have been fired by strikers or their sympathizers, passed through the bunkhouse occupied by men who have continued to work since the strike and through a cabin also occupied by such individuals.

Since the strike started, General Manager W. E. Hamilton of the Leitch Collieries has been able to keep a sufficient number of men at work to obviate the necessity of closing down his development work completely. At the present time he has sixteen men working. At different times, it is said, attempts to intimidate the men who have continued to work have been made but it is only recently that anything desperate has been resorted to. Some days ago the bunkhouse was shot up while several men were inside. Several shots passed through the building but no one was hit. Yesterday morning there was more shooting. A cabin occupied by two of the men still working was the target. As before, the bullets tore through the cabin without injuring the occupants.

The matter has been reported to the police but thus far nothing has turned up to reveal the identity of the parties who have been doing the shooting. In view, however, of the fact of threats against General Manager Hamilton and also against at least some of the men, the presumption is that the shooting has been done by strikers or sympathizers.

### FRANK PLAYED GOOD GAME

The Frank football team played its first game in the league series at Michel Saturday against the league leaders and as evidence of the kind of team Frank has this year it may be noted that whereas Frank has had but few practices and had not had a game of any kind previously, yet the team was able to hold the leaders to a score of 1-0 and that by the flukiest kind of a decision by the referee who penalized Frank for an alleged foul which as a matter of fact was not really a foul and by awarding Michel a kick the one goal was made which defeated Frank.

The Frank boys are reputed to have put up a superlatively fine game considering the circumstances, indicating they will have to be reckoned with before the championship is settled.

Bellevue and Hosmer played at Bellevue and Coleman and Fernie at Fernie the same day. Bellevue maintained her position in the first division by winning 1-0 and also Fernie by a score of 5-2.

As last week, Michel, Fernie and Bellevue are tied for first place with the Michel having just a shade the best of the standing through having played one less game than the other two teams. Coal Creek is the other team in the first division, having one point the best of Coleman, at the head of the second division while Frank, Hosmer and Cowley are tied for the seller leadership except that Frank has only had one game against two for Hosmer and three for Cowley, giving Frank a strong second place in the second division.

Following is the standing of the teams:

Teams	Won	Lost	Draw	Points
Michel	3	0	1	7
Fernie	2	0	3	7
Bellevue	3	1	1	7
Coal Creek	1	1	1	2
Coleman	0	2	2	0
Frank	0	1	0	0
Hosmer	0	2	0	0
Cowley	0	3	0	0

### CHANCE FOR PROMOTION LEAGUE.

There is an opportunity for the recently organized Prairie and Pass Promotion League to render a real service to the territory, the interests of which, the league is designed to promote, if there is foundation for the inference some people are disposed to draw from its apparent attitude of the C. P. R. relative to its much talked of grade revision scheme.

For two years the railroad company has talked of rebuilding much of the Crows Nest line between Macleod and the summit of the main range and only a few months ago it was announced the work would be done this year. Since that time, according to talk that may be heard in the street, the company has considerably altered its plans. No doubt much of the gossip going the rounds has little foundation but it is reasonably certain that that portion of the gossip which has it that Cowley is not to be moved is true and if that is the case it is not unlikely that other portions of the general tale are founded on fact. That portion of the story to which we refer and which, if true is of vital importance to this district, is to the effect that not much if anything will be done in connection with the regrade scheme beyond the building of another track from Frank west. It is said the proposal now is to run a track from Frank station or thereabouts along the north side of the valley, between the smelter and the hill to the north and keeping as close to Goat mountain as possible, swinging around the point of the mountain at the old line kiln at the west bridge and holding well to the north side of the valley from there west.

The inference some people draw from this is that it is the intention of the company to block the possibility of another road being built through 'The Pass' as the building of such a line would make it and render it necessary for any other road that might build, to use C. P. R. steel through the narrow gap which would of course be a great deterrent and probably prevent any other line from building since, while any other road could not be prevented from getting through by using C. P. R. track a short distance, it would not be entitled to switching privileges and no road would be likely to wish to come through under such conditions.

Of course this is all gossip, pure and simple—as yet—but sometimes the gossip gets it pretty nearly straight and if the C. P. R. should build such a line it would no doubt put an end to all hopes for a competing road. In view of the possibility of such a thing happening it would be good policy for the league to get busy with the railway commission and forestall the possibility of such a consummation by procuring a ruling forbidding any one road to maintain more than one line of track through the gateway.

NOT THE REAL NEWSPAPERMAN.  
Says the Edmonton Bulletin:  
An Imperial press conference is to be held in London, and the delegates afterward told about the Motherland in royal style, received at Windsor castle, lunched by duchesses innumerable and shown the beauty of the Trossachs and the industries of the Clyde. The gathering will be largely attended—by wealthy gentlemen who own stock in newspapers, by salaried journalists who draw fat cheques for looking wise, and by titled gentlemen who have escaped the "daily grind"—all of whom have about as much to do with the real making of the Empire's newspapers as they have with the operation of the solar system. Press excursions are notable in the newspaper office chief, by whom they set the type who is

not missed out of the road for a time. The man on the job rarely attends them; he stays on the job and demonstrates how well the concern can get along without the others. He may get to a ball game once in a while—if he can find time or to an opera—if the press agent is wise. But if he ever gets to Liverpool it will be on a cattle boat, and what he knows of Loch Lomond bonnie banks he gathers from half tones, and the budding soprano next door. Yet he is the man who gives tone, temper and spirit to the newspaper, who determines the influence it shall exert day by day. Not likely there will be many of these men in the royal progress through the British Isles. More likely they will be at home in Montreal and Toronto and Melbourne and Auckland, standing on the bridge at midnight and all other times—watching the chance to put a shot in whatever threatens the integrity of the Empire. But this will not prevent them hoping that the provinces have a good time with His Majesty and Lord Northcliffe and the duchesses.

Sir William Van Horne has been telling people in London that railways on this continent do not charge enough for their services. Discretion and courage are essentials to success. Sir William has both. He displayed his discretion in getting across the ocean before he disclosed this information to the world, but even so it took a man of hardihood to do it.

A pocket compilation of statistics of the resources of Canada has been issued by the Interior Department. It contains, also, a neatly printed map showing the mineral and other products of the Dominion and the districts in which they are to be found. After perusing the statistics and examining the map the average Canadian feels inclined to be cheery and is of opinion that he is a citizen of no mean country.—Daily News, Calgary.

## THE FRANK PAPER

That F. O. Adams of Spokane who is fostering the Carbon Hill Coal company which has valuable coal holdings on the South Fork is a promoter worthy of the name, is indicated by his latest move. In furtherance of his efforts to make the Carbon Hill company the big concern he hopes to see it through the sale of stock. Mr. Adams has adopted the idea of publishing a periodical which he calls The Coal Consumer, the first number of which has reached the desk of The Frank Paper. In his salutatory "Editor" Adams says:

"We have procured a desk, chair, a pair of shears, an office cat and a typewriter, made arrangements with the printer to hold us up for awhile and are prepared to edit.

"There are three things in this world that every man knows that he could do successfully—run a hotel, edit a newspaper and raise chickens—we still have the chicken business to fall back upon.

"This little publication is, as its name indicates, intended to further the interests of and for the general information of the man who "pays the coal bill"—his name is legion—and we shall endeavor to stick to COAL, first, last and all the time, however—merely as a matter of having a safety valve we have reserved a little corner to ourselves on Page 4 and as divers times we will probably break forth on prohibition, restricted districts, war with Japan, Bryan as a presidential possibility and other burning topics of the day—if you do not agree with us we will gladly open these columns to "Tax Payer", "Citizen" and "Vox Populi" with full permission to prove that we do not know what we are talking about and eventually, no doubt, the chickens will get a chance.

"There are a few things that we still lack, among them a circulation manager and a sworn circulation, but with the "Dear Readers" kind co-operation, together with a few of his or her friends, we have arranged to Journalistic beliefs where we can allude to the "Power of the Press and its Mission as a Public Educator."

FRANK,

ALBERTA.

## Frank News in Brief

Alex Goyette, dealer in furniture and wall paper.

In a runaway accident in Frank Sunday, Arthur Jolly and a companion of Coleman were thrown from the rig and Mr. Jolly quite severely injured. Mr. Jolly was taken to the hospital and was able to return to Coleman Monday.

Theater goers will be vastly disappointed over the fact of the San Francisco opera company having canceled its date at the Coleman opera house for this evening. The management felt that owing to the shut down it was inadvisable to take the chance of a heavy loss.

Two accidents occurred on the Crow Saturday last which delayed traffic for some hours. The east-bound local was derailed at Pearce, eight miles east of Mueland and one passenger was slightly injured when the forward coach careened but did not go over. A freight jumped a little later three miles further west. Beyond tearing up quite a stretch of track no particular damage was done.

There has never been a season when there was such a contrast in the growing conditions in the foothills and on the prairie as the present one. In the foothills grass and crops are fully twice as high as on the prairie while the difference in the condition of stock is just as great. Animals that have ranged on the prairie are thin to the point emaciation while those of the foothills are in fine condition and almost fat.

The resignation of Norman Fraser as chief coal mine inspector for Alberta to take the superintendency of the Crow Nest Pass company's mine at Michel has resulted in a general rearrangement among the mine inspectors. Robert Livingston is promoted to chief with headquarters at Edmonton. J. T. Stirling, formerly deputy in the Lethbridge district, takes charge in The Pass and A. R. Wilson, recently appointed, has the Lethbridge district.

It is reported from Passburg that a shameful destruction of deer in that locality has been in progress the past few weeks. It is stated that in no less than eight different instances deer that have been shot have been left lying where they were killed, supposedly through fear on the part of the slayer of detection in attempting to secure the carcasses. Anything so shameful and flagrant in the way of violations of the game protection law has never before been reported in this section.

Acting Superintendent Chudleigh and Resident Engineer Rossiter of this division of the C. P. R., spent some time in Frank Thursday.

WIN A \$5000 HORSE—A chance to win Forest Patch, sired by the famous Dan Patch. It costs you nothing. Find out all about it at the Crow Nest Pass Hardware Co. Call or write at once.

For Sale—I am offering for sale a fine section of farming land, viz: Section 20, Township 9, Range 2, west 5 meridian, situated at Livingston, Alberta adjoining the Wilson ranch. Tenders for purchase of same will be received until June 30th 1909. Address, Mrs. J. W. Curry, Box 49.

Lewis Stockert, chief of the coal mining department of the C. P. R., who has resided at Bommer during the development of the mine there and the installation of the plant, is returning to Bankhead to live. D. G. Wilson, superintendent at Bankhead will be in charge at Bommer and the present superintendent, R. G. Drinnan, will go north to take charge of prospecting work for a company operating west of Edmonton.

Samuel McVicar, formerly mine manager for the Canadian American company, has been engaged as manager by the Western Coal and Oil Consolidated company which is opening a new mine on Beaver Creek west of Pincher Creek. Mr. McVicar and family stopped off in Frank Thursday last enroute to the mine. The company has about thirty men working and last week had its first strike over a disagreement over the charge for board. Mr. McVicar took hold Monday and is expected to settle the matter and resume work at once.

The members of the arbitration board now investigating the coal strike under the provisions of the Lemieux act are spending the week in The Pass taking evidence in connection with the various local questions over which there is disagreement at the different mines. Monday Lille was visited. Tuesday was spent at Bellevue and yesterday at Hillcrest. Today the board is expected to go to Coleman. The principal question being inquired into is the price of pillar work, over which there was much dispute all during the life of the old agreement. There were no other developments during the week in connection with the efforts being made to produce a settlement.

The ladies of The Pass who are thinking of spring coats may profit by noting the change of ad of Harvey Murphy in this issue.

Chief Mine Inspector Robert Livingston and his assistant, A. R. Wilson held examinations in Frank yesterday of applicants for fire boss papers.

The warm weather of the past few days should turn the thoughts of Frank people to the screen windows and ice cream freezers carried by the Crow Nest Pass Hardware company.

A big consignment of ranges was received by the Crow Nest Pass Hardware company Tuesday.

F. Askey has had his photographic studio open this week. He returns to Lethbridge tomorrow evening.

Former Mayor W. W. Tuttle of Fernie has engaged in the real estate business in Spokane and is planning a new addition to the city.

A total eclipse of the Moon occurs this evening between 7 and 8 o'clock. It is supposed to be visible in this region. A partial eclipse of the Sun occurs the 17th.

A sitting of the district court will be held at Coleman next Tuesday.

Superintendent P. C. H. Primrose of the mounted police spent Tuesday and Wednesday in Frank.

One more case of scarlet fever developed Monday. The afflicted is the child of Mrs. Prior.

Repairs have been made to the intake of the water system and the difficulty is a thing of the past.

A meeting of baseball fans was held at Blairmore last evening to endeavor to organize and get baseball games arranged for the summer.

Barney Stitt of Coleman who has been away on a month's vacation, returned Tuesday.

It remained for a resident of Lundbreck to stir up the people of Frank and Blairmore to the point of cleaning up and improving the appearance of the Blairmore cemetery, and jointly by the two towns. Thos. Maden, being interested through having friends buried there, proposed that volunteers from both places be called out and yesterday came up himself and took part. With several hands from Frank and Blairmore appearances were much improved.

## Miners and Shippers of Bituminous coal.

The Company carries three grades of coal, screened, mine run and slack. The screened is unequaled for domestic or furnace use. We recommend the mine run and slack for steam purposes, and can guarantee it to be clean and give absolute satisfaction.
